

Random Notes

In publishing details of the new list of honours bestowed in connection with the celebration of the Queen's birthday, the Canadian press made headlines of three recipients: Miss Edith Sitwell, who becomes Dame of the British Empire; Mr. Somerset Maugham, who is created a Companion of Honour, and Mr. Beverley Baxter, on whom is bestowed the honour of a Knighthood.

Mr. Baxter, a Conservative member of parliament in the British House of Commons, and a stout supporter and admirer of Sir Winston Churchill, thus joins the ranks of these expatriate Canadians, which includes Lord Beaverbrook (Max Aitken), and the late Lord Bennett, prime minister of Canada 1930-35, who left their native country for Britain where their talents and energies would receive greater recognition than at home under a Whig administration, such as the Canadian Liberal party, which long ago decided against the creation of a series of Knights and Lords in a democratic country, electing rather for the dull level uniformity of Mr. and Mrs. among its citizens.

Indeed, the only distinction a rising politician can hope for in Canada is to be appointed a member of the Privy Council, and to be addressed as Right Honourable. Mr. Baxter's knighthood is stated to be in recognition of "political and public service."

Of the two others mentioned, Miss Sitwell, a poet, has long been distinguished for her efforts in the sphere of Art; while Mr. Somerset Maugham's reputation as novelist and dramatic author has become world-wide.

News on the Canadian labor front, last week, was marked by extreme contrasts.

On the one hand, members of district 18 United Mine Workers of America have agreed to a new one-year contract which leaves wage rates unchanged, the vote being overwhelmingly in favor of accepting the contract.

Down at Windsor, Ont., however, automobile workers are taking a 30-cent an hour increase from Ford of Canada.

A conciliation board opened hearings Wednesday on the deadlocked contract negotiations between Ford and the CIO United Auto Workers Union.

The hearings got underway in the midst of major layoffs by Ford in both Windsor and Oakville. A total of 6000 are now out of work—2000 of them indolent.

Meanwhile, in Calgary, the Carpenters' union put forward a new scheme.

It was proposed that the hours of labor be progressively shortened as a cure for unemployment!

CNR Wins U.S. Safety Award

Canadian National Railways has been named a winner of a U.S. National Safety Award for its public safety activities, according to advice received here from Chicago by Donald Gordon, chairman and president.

The C.N.R. received its award for its system-wide safety activities which included public and family safety meetings with a 1953 attendance of nearly 15,000 persons, the use of a safety instruction car and motion pictures, and sales representative in a number of Canadian safety organizations.

The British of Niagara Falls received the best per year due to erosion.

Wedding Bells

Parkie-McMurchie

Baskets of spring flowers banded the altar of North Hill Presbyterian Church in Calgary for the recent marriage of Miss Emily Jacqueline McMurchie, daughter of Mr. and Mrs. Jack McMurchie, of Delia, Alberta, and Mr. John Stewart Parkie, son of Mr. and Mrs. W. J. Parkie, of Calgary.

Rev. A. F. Howick officiated at the afternoon ceremony.

Given in marriage by her father, the bride wore a waist-length gown of white lace panels over a bouffant skirt of corded tulle and tulle net. The bride featured a Peter-Pan collar and molded waist line. An Illinois veil was caught to a lace halo. She carried a bouquet of American Beauty roses. The bride's only jewelry was a pearl necklace worn by her mother and two older sisters at their wedding.

Bridesmaids, Elizabeth McMurchie, sister of the bride, and Dorcas Parkie, sister of the groom, wore similar waist-length gowns of lace and net over tulle in blue and pink respectively, with matching bouquets of carnations.

Best man was Jack Woolley, Douglas Kelly and Bill Churchill, and the bridesmaids, Miss Emily Parkie, sister of the bride, and Mr. and Mrs. J. F. Hannon proposed the toast to the bride. Master of Ceremonies was Mr. David Murlion.

Among the guests were relatives and friends from Penitence, B.C.; Regina, Sask.; Edmonton, Ponoka, Stettler, Hanna, Delia and Enderby.

The couple left later for their honeymoon trip to Great Falls, U.S.A.; and Regina. The bride donned a navy blue dress, with white accessories, and complemented her ensemble with a corsage of yellow roses.

The ceremony was presided in Calgary at 2324, 24th Avenue N.W.

DELIA F.W.U.A.

The regular meeting of Delia local F.W.U.A. was held Thursday, June 10th, with 13 members present. A questionnaire was filled out re radio programs. A discussion was held in the evening concerning the painting the Rest Room. A letter was read from Mrs. J. Gaschitis on sub district activities. It was decided to hold a bake sale on June 25th. Ward was received from Head office that Mary June Dunes is the winner of the Junior F.W.U.A. Queen Contest, and will reside at Farm Young People's Week, to be held in Edmonton. Bulletins were read on Burnaries and Schoolbuses, Social Work, and the Safety Driving, Leadership Course. The July meeting will be held at the home of Mrs. Robert Stevenson on July 15th. A delicious lunch was served by Mrs. H. Stevenson and Mrs. S. Sloan.

—Mrs. F. Smith, Sec.

Summer-fallow

Lethbridge Experimental Station Weekly Letter
D. T. ANDERSON, Agricultural

Records at the Lethbridge Experimental Station for the ten months, August 1, 1953 to June 1, 1954, indicate that 8.12 inches of precipitation have been received, as compared with a 52-year average of 12.46 inches for the same period. These figures may be taken as an indication of possible drought conditions, or at least as a warning that summer-fallowing operations should be carried out with extreme care to ensure maximum moisture conservation.

Summer-fallowing provides, through moisture conservation, a form of crop insurance. In addition, it prevents the opportunity to control noxious weeds and to incorporate heavy trash into the soil in preparation for seeding operations. Along with these benefits, the practice of summer-fallowing carries with it the obligation to provide, through strip cropping and trash cover farming, protection for the soil against loss of fertility by erosion.

In some areas, the first operation on fallow land has been completed. In other areas, following has just commenced. Good weed control and trash conservation are important factors in the fallow program. Generally, in the brown soil zones, the use of disk-type tillage implements should be limited to one operation on fallow. Under heavy trash conditions, a second disking operation, preferably just before or at seeding time, may be necessary to facilitate the use of the seed drill. All other operations should be carried out with subsoil cultivators, such as the blade cultivator, the heavy duty cultivator, or the road weeder.

Recent experiences in Manitoba and in parts of the United States indicate that we cannot relax in the fight to prevent soil erosion. The best protection is provided by a good trash cover or a healthy growing crop.

On May 1 Canada had 42,400,000 pounds of butter in store, including 83 million pounds held by the government.

Got those cost-of-living blues?

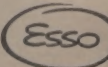

Most people seem to have them these days. Prices have gone up and up... food, housing, just about anything you can think of.

But gasoline has tried hard to keep its feet on the ground... and with some success... 119¢.

Because while wholesale prices in general are up 119¢, more than double what they were before the war... Esso gasoline across Canada are up only 42¢... about a third as much as most other things.

Here in Alberta, Esso is up even less. At Edmonton for instance, the wholesale price is only 142¢ higher than pre-war.

IMPERIAL OIL LIMITED

.. World Happenings In Pictures ..

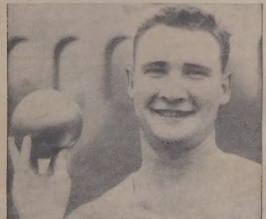

THE ROCK OF GIBRALTAR serves as a backdrop for Queen Elizabeth and the Duke of Edinburgh as they review personnel at North front airfield while visiting the "Rock".

"MUDDER" WON'T LIKE THIS—A dousing with muddy water doesn't dampen the enjoyment of the little boys at left, as they watch a cyclist roar through a mudhole during the annual Queen City Mud Run near Seattle, Wash. The daredevil event is held annually for the benefit of west coast motorcycle addicts.

HAPPY DAY—British miler Roger Bannister grins happily as he holds a batch of congratulatory telegrams and messages for his feat of breaking the four-minute mile. Reports estimated the starry miler was receiving a letter a minute for three days after his brilliant run.

OPEN SEASON ON RECORDS—Parry O'Brien has set a new world's record for the shot put following his recent toss of 60 feet 5½ inches in Los Angeles. Parry, whose new record quickly followed Roger Bannister's 4 minute mile, predicts that he will throw the shot 62 feet before the season's end.

MAN RESCUES ST. BERNARD—"Snowbound Gem," 250-pound St. Bernard whose ancestors still rescue stranded travelers in the Swiss Alps, is herself on the receiving end of a "rescue" effort. Her owner, E. P. Everhard, of Downers Grove, Ill., constructed this five-customer canine cafeteria to help "mom" with her 18-pup chore at mealtime. (Only nine pups are in the picture—the 19th went out for lunch.)

M-O-O-O-ST CONVENIENT—Out for an early morning stroll on a farm near Salem, N.H., Bossie enjoys the convenience of a bridge for bovines only. Spanning Route 38, the de luxe cattle crossing is believed to be one of the few of its kind in the country.

SOUTHERN FASHIONS—Jeweled-linen shorts and a trim blouse are sun-suited for Miami wear, and the addition of a tie-on side-slotted skirt to the Margaret Newman-designed outfit makes it correct and comfortable for wear at cocktail time. However, a little farther south (in Antarctica), Australian Phillip G. Law, leader of a research team exploring for uranium, finds that the correct costume for hot-grog time includes: Polar bear fur gloves, steel-spiked shoes, a parka and a steel-tipped walking stick.

LOOK TO YOUR LAURELS, BOYS—The ladies are getting a head start in the race for fame as tomorrow's writers and dramatists. Editor Rodin, of the above typeset, took the latest edition of the Kenwood (Chicago) Press. Pet Chibrowsky, a Russian, was in charge over the 10-sheet mimeographed operation, staffed by 8- to 21-year-old reporters. Below, Martine Toussaint-Samnt, 24, reigns as France's youngest authoress. Her first play, "Pearls of Crystal," will soon be produced by a French radio company in Paris, where Martine lives.

WAVE GREETING—Queen Elizabeth and the Duke of Edinburgh wave a greeting. The Royal family sailed from Gibraltar for London aboard the Royal Yacht Britannia.

TAKE SALUTE—Israel chiefs of staff and Prime Minister Moshe Sharett, take the salute at a reviewing stand at Rameh, Israel, as the country marked the sixth anniversary of its independence.

PERFECT GENTLEMAN at five, is Prince Charles, who gives young sister Princess Anne a helping hand down the steps. The Royal children were leaving a hotel in Malta after a parade welcoming their parents to the island.

Areas In Northern Sask. Named After Servicemen

Due to the expanding development of the Crackingstone and Goldfields uranium field in northern Saskatchewan it has become necessary to officially name further lakes, islands, bays and creeks for purposes of identifying the location of mineral claims and improvements made by public and private organizations. Resources Minister J. H. Bruchelbank said recently.

In accordance with the practice of the department, the names selected are those of Saskatchewan servicemen who gave their lives in defence of Canada during World War II.

The following names in the Crackingstone Area, 400 miles northwest of Prince Albert, are in honour of service personnel who lost their lives during World War II.

MOORE LAKE—after Mr. Moore, Donald Lee, brother of J. V. Moore, Regina.

EDWARD LAKE—after PO Edward, Edward, brother of J. V. Moore, Regina.

STANLEY LAKE—after Mr. Stanley, Stanley, brother of J. V. Moore, Regina.

AMPHIBIOUS VEHICLES—Most motorists driving from Montreal to Edmonton keep to the roads and when they can't make it "cross over the bridge." This is what Robert, of Paris, France, who is shown above prior to starting out on the last leg of the Paris to Edmonton run, is about to do. He is about to start his 1000-mile drive in a 1942 German Volkswagen which will cruise along at 75 m.p.h. on land and a good deal better than eight knots on water.

Plan Rehabilitation For Sclerosis Patients in Saskatchewan

An attempt is being made during the current year to establish rehabilitation and treatment centres for Saskatchewan citizens suffering from an unknown but prevalent disease, Multiple Sclerosis.

The Saskatchewan Council for Crippled Children and Adults, dedicated to improving conditions for Saskatchewan's handicapped citizens, has offered its services to help in this and is seeking the co-operation of newspaper, radio and general public.

Multiple Sclerosis, as it is known, is a disease which affects largely young adults. It is a disease which has been known for many years, but its cause is not known.

At present there is no known treatment and rehabilitation techniques have been developed which have proven helpful.

A group of research, however, is being carried out in an attempt to uncover the cause of the disease.

At present there is no organization known in Saskatchewan, located in Regina, which is attempting to further the work of research.

At a recent meeting in Regina officials of the branch of the Council of the Saskatchewan Council for Crippled Children and Adults, decided to take action against the disease.

It was decided to make contact with those to see what progress of service could be established to assist them. Persons who have contracted the disease, rather than where they live, are invited to write or contact the Saskatchewan Council for Crippled Children and Adults, at 214 Ross Road, Saskatoon.

GERM HARBOR
Germes find a safe breeding place in the broken rough edges and cracks of damaged codrery which cannot be cleaned thoroughly. In this way, disease germs may easily be distributed. In restaurants, cracked dishes and cups should not be used for the service of food and containers should be replaced as soon as they are damaged.

When tables were built in the Oregon Lumber Co. in the eastern part of the world, the tables were built in the eastern part of the world.

Jersey Cow Likes The Bright Lights
You have heard of the many farmers' daughters who have sought out the bright lights of the large cities to complete their education. But you have not heard of a poor little Jersey cow that lapsed into the city of New York at night, on the way to the city.

She was bright and intelligent, and she was very much interested in the city. She was very much interested in the city.

She was very much interested in the city. She was very much interested in the city.

Hospital Erected For Epileptics In Honor Of Dieppe Soldier

Death of Maj. Paul Savoy during the wartime Canadian raid on Dieppe was the beginning of an unusual episode in the long story of many who die for their country. In this case, a fatal burst from a German machine-gun Aug. 18, 1942, was to result in a new hospital on life for many victims of epilepsy.

A three-story stone new hospital, a memorial to Maj. Savoy, is under construction at Les Pavillons Montreal, and all Canadians lost at Dieppe, was erected on the site, 20 miles from Montreal.

The epidemic, which is the only hospital in North America specially designed and with occupational therapy aimed solely for the care of epilepsy. They say it may be the only one of its type in the world.

Built largely through the efforts of the late George A. Savoy, David's father, the hospital has opened a drive for \$75,000 to build a new wing. Currently catering for 80 patients, it has a long waiting list.

Compassion and guidance for the epileptic, the hospital has since opened its doors in superstitious dread of the non-demonstrational institution.

Learning that he never settled for epilepsy, Mr. Savoy, a man of letters, began a drive for funds among his business associates, hospital, Dieppe House, was opened in 1945.

Mr. Savoy's three sons, Harold, president of Dieppe House, John, a lawyer, and George, a doctor, of Montreal business men in carrying out the wishes of their father, who died two years ago.

Maj. Ove Bonhomme, hospital superintendent, said the institution is self-supporting with the aid of private grants from business and professional groups and private donations.

Ramps take the place of stairs and there are no hallways doors. These are safety precautions to protect patients from injury during epileptic seizures.

A 55-year-old patient, Victor Smith, told his story of how he came to the hospital. He had been epileptic since childhood.

"In all, we've treated 250 men, the superintendent said. The hospital is now open for patients to be treated for epilepsy.

"The 'difficult' cure for epilepsy is the only one that has been made possible. By far the majority of epileptics are Quakers, estimated at 16,000, are in a normal manner, Maj. Bonhomme said.

Dieppe House now is an all-arms hospital, and the hospital has two bays by no means given up the cause of George Dieppe, who was a separate building for women.

New Luminous Paint Regulations Set Up

Regulations under which a new type of radioactive luminous paint will be handled have been set up in an order-in-council passed by the provincial government.

The new product, which is made in a by-product of the atomic energy of uranium, is known as "luminous paint," estimated at 16,000, are in a normal manner, Maj. Bonhomme said.

The regulations will be applied to watch dials and other objects than radioactive luminous compounds previously used and will be distributed more freely.

The federal government has asked provincial governments to put into effect the handling of radioactive materials, and the handling of the substance and the handling of the substance.

The regulations will be applied to watch dials and other objects than radioactive luminous compounds previously used and will be distributed more freely.

Night Car Speed Reduced In Alta.

Reduction of the maximum speed of motor cars operating at night on Alberta highways from 40 to 30 miles an hour is one of the main changes in the bill to amend the Motor Vehicle and Highway Traffic Act which was approved by the Alberta legislature at its recent session.

Here is the new section: No person shall drive a motor vehicle on a highway at a rate of speed greater than—

(a) Fifty miles an hour at any time when the headlamps of the vehicle are required to be alight or

(b) Fifty miles an hour at any other time.

Another new provision states that a person who is not to be in the driver's seat of a motor vehicle while the vehicle is in motion, shall be liable to a fine of not more than \$50 or less than \$25.

The bill also provided for automatic suspension of licenses for periods specified when a person has been convicted of certain traffic offences. Formerly, a magistrate did not have this authority until legislation was passed.

Another section empowers a magistrate to suspend or cancel a driver's or chauffeur's license if such person has been convicted of speeding within a city or town or in a highway.

Formerly, a magistrate did not have this authority until legislation was passed.

Another section empowers a magistrate to suspend or cancel a driver's or chauffeur's license if such person has been convicted of speeding within a city or town or in a highway.

Dated this 11th day of June, A.D. 1954.

PUBLIC TRUSTEE, Administrator of the Estate of Victor Baptiste (Baptiste) Dechene, deceased. Land Titles Building, Edmonton, Alberta. 24 25p

permanent international settlement in foreseeable future.

International scene in its proper perspective is set forth with stark realism in editorial article in May issue of Harper's Magazine. Facts and figures as given by Harper's may, for all practical purposes, be taken as equally applicable to Canada.

About 5 per cent of world's population, Harper's points out, live in the U.S. Americans use about 50 per cent of world's output of raw materials, make about half the world's manufactured goods, and, roughly, enjoy about half of the world's wealth. Remaining 95 per cent of mankind get along, rather badly, on the remaining half. There is only about one acre of farming land for each of the two and a half billion inhabitants of the planet, but it takes more than two acres to feed a person adequately. With world population growing at rate of 55,000 a day, a lot of already hungry, a lot more will be even hungrier.

U.S. and, for that matter, Canada, article concludes, face an era of strife, in which the hungry 95 per cent eye enviously the lucky 5 per cent. North America, if it is to survive, will require allies and a strong garrison. Efforts such as UN technical assistance, the Colombo Plan, and like economic aid schemes are but a effort to reduce the pressure a little by feeding the hungry hordes outside the North American continent. But, the article points out, called such things Tribute to the Gods and the Hungry. Only hope lies in position of the "have-nots" will learn and adopt in time the economic principles which are the foundations of North American wealth and security.

The value of goods imported into Canada in 1953 was \$500 million more than in 1952 with the rate of Canadian exports was down to nearly \$200 million. Quick Canadian Facts.

Local and District

The annual Cemetery Tea will be held in the Legion Hall, on Saturday, June 26th, starting at 3.00 p.m.

Mr. and Mrs. Alfred Piffer and family, Mr. and Mrs. Harold Piffer and family, of Calgary were motor visitors in Delia over the week end, the guests of the farmers' parents, Mr. and Mrs. W. Piffer.

As will be seen by advt. on front page, the Hanna Memorial Arena Association will hold postponed Car Bingo on Wednesday next, June 23rd at 8.00 p.m. There are \$4.00 in prizes; also door prizes, and many others.

Variable weather was experienced over the week end, with heavy showers and intermittent dry warm periods and bright sunshine. At present writing skies are overcast and threatening rain, with brisk winds and the temperature 65 degrees.

Searle Precipitation Report

Compiled from the Records of Government and Weather Bureau Records up to and including June 15th, 1954.

The heavy rains that fell widely over the prairie provinces during this past week, have well further improved the moisture situation in the West. The total moisture content of the three prairie provinces, as weighted for area, is now, some stands at 103 per cent of normal, compared with 101 per cent last week and 113 per cent at this time a year ago. The Alberta condition is now 99 per cent of normal, Saskatchewan 104 per cent and Manitoba 107 per cent.

A further rainfall is forecast from April 1 to June 8 now stand at 110 per cent of normal. Saskatchewan 117 per cent and Manitoba 124 per cent.

All crop districts in Alberta with the exceptions of 1, 2, 3, 4 and 17, now have had better than average seasonal rains.

In Saskatchewan all crop districts have had better than average rainfall, with the exception of crop district 1 which has had only slight rains.

In Manitoba all crop districts have had better than average rainfall, with the exception of crop district 1 which has had only slight rains.

Rainfall in some areas of Alberta have been excessive and over a fairly wide area in all three prairie provinces seedling has been still further delayed. There is still an urgent need for warm, dry weather to promote growth and to permit the completion of seedling operations.

Wheat Pool Crop Report

The latest of the Alberta Wheat Pool's weekly crop reports says that because of better seedling operations wheat acreage in Alberta may be down 9 per cent from last year. Out average will be up 4 per cent from a year ago and barley up 9 per cent. A reduction in wheat acreage is expected in all parts of the province, ranging as high as 35 per cent in the area west of Bad Deck and 29 per cent in crop district 14 which takes in the Woodstock-Althaus area.

As at May 28, 79 per cent of the province's wheat seedling had been completed compared with 86 per cent at the same time last year. Seedling of corn grain, however is not nearly so far advanced, being only about one-quarter completed.

U.S. Dumping Feed Grains

On Thursday last week the United States department of agriculture announced that the nation's surplus feed grain would be sold off on world markets at competitive prices. This is somewhat alarming to other nations which produce surplus feed grains, particularly Canada. The U.S. government holds 700 million bushels of corn, 32 million bushels of barley, 6 million bushels of rye and 10 million bushels of oats for which the producers have received a substantial price under government guarantees. Indications are that such surpluses will be sold off on world markets at prices which really amounts to "dumping" the tendency is likely to be that other countries will be compelled to cut prices to compete with U.S. offers.

C.N.R. HOLIDAY TOURS

Something new in travel planning has been introduced by the Canadian National Railways for summer season.

Railway trips running from week end to two week vacation periods or longer at costs suitable to the pocketbooks of everyone have been set up by the company's new department of tours. The problem of working out itineraries, making sleeping car and hotel reservations, arranging sight-seeing trips and other details are eliminated for the traveller.

The tours are unaccompanied and may be made on an individual or group basis with transportation, hotel accommodation, sightseeing situations and in some cases, meals, all taken care of by the one ticket received before the vacationist departs on the journey.

More than 70 of these specially prepared trips are being offered by the C.N.R. this summer. Robert Simmons, manager of the newly formed department reports. Originating from 10 major cities across the system including Winnipeg, Saskatoon and Edmonton, the variety of holiday travel to choose from includes anything from a week end to a full two-week trip.

Canadian manufacturing industries trend out goods with a peak value of \$16,200,000,000 in 1953.

Card of Thanks

I would like to take this opportunity of thanking all those very kind people for the wonderful cards I received while in the hospital. There were also a great number of people who sent so many things to me, and your wonderful kindness was deeply appreciated. Many, many thanks everybody. Yours sincerely, Mrs. H. Brunner.

As required by The Income Tax Act, this will advise our customers that it is our intention to make a payment in proportion to portage in respect of the year ending the 30th day of June, 1955, and we hereby hold forth the prospect of portage payment accordingly.

This refers to Wheat, Oats, Barley, Flax and Rye sold to the Company or through its country elevators between July 1st, 1954, and June 30th, 1955.
